Contents

Ageev O: The homogeneous spectrum problem in ergodic theory 417
Arapura D: The Leray spectral sequence is motivic 567

Bergelson V, Host B, Kra B, Ruzsa I: Multiple recurrence and nilsequences 261
Birman JS, Menasco WW: Studying links via closed braids IV: composite links and split links (Erratum) 447
Borisov A, Sapir M: Polynomial maps over finite fields and residual finiteness of mapping tori of group endomorphisms 341
Brubaker B, Friedberg S, Hoffstein J: Cubic twists of $GL(2)$ automorphic L-functions 31

Calegari F, Emerton M: On the ramification of Hecke algebras at Eisenstein primes 97
Chinta G: Mean values of biquadratic zeta functions 145

Deitmar A, Hoffmann W: Asymptotics of class numbers 647
Deraux M: A negatively curved Kähler threefold not covered by the ball 501
Downarowicz T, Newhouse S: Symbolic extensions and smooth dynamical systems 453

Emerton M → Calegari F
Eskin A, Mozes S, Oh H: On uniform exponential growth for linear groups 1

Fayad B: Rank one and mixing differentiable flows 305
Friedberg S → Brubaker B

Gubeladze J: The nilpotence conjecture in K-theory of toric varieties 173

Hoffmann W → Deitmar A
Hoffstein J → Brubaker B
Host B → Bergelson V
Huibregtse M: On Ellingsrud and Strømme's cell decomposition of $\mathrm{Hilb}^n_{\mathbf{A}^2_{\mathbf{C}}}$ 165
Hwang J-M, Mok N: Prolongations of infinitesimal linear automorphisms of projective varieties and rigidity of rational homogeneous spaces of Picard number 1 under Kähler deformation 591

Kable AC, Yukie A: On the number of quintic fields 217
Kra B → Bergelson V

Lee JR, Naor A: Extending Lipschitz functions via random metric partitions 59

Menasco WW → Birman JS
Mok N → Hwang J-M
Mozes S → Eskin A

Naor A → Lee JR
Newhouse S → Downarowicz T

Oh H → Eskin A

Ruzsa I → Bergelson V

Sapir M → Borisov A
Schmidt A: Tame class field theory for arithmetic schemes 527

Tian G, Viaclovsky J: Bach-flat asymptotically locally Euclidean metrics 357

Viaclovsky J → Tian G

Yukie A → Kable AC
